Welcome to Aurea Monitor 2021 R2.1

Aurea is happy to announce and provide release version 2021 R2.1 that fixes a few issues and provides additional improvements in Aurea Monitor.

- **Release version:** 2021 R2.1

For details, see the following topics:

- [About Aurea Global Support](#)

About Aurea Global Support

You can find the setup files on the [Aurea Monitor Product Downloads](#) space on [Worx](#).

If you encounter a problem while using an Aurea product or require assistance with downloading the software or upgrading a product release, please, try to:

- Search the articles on the [Aurea Knowledge Base](#) for solutions to your issues.
- Search the product documentation and other product-related information that are also available on [Support Central](#).
- Ask your question on the [Aurea Integration Solutions Hub](#) on [Worx](#).

If you still cannot find a solution, open a ticket on [Aurea Support Central](#). Information about the support organization is available on [Support Central](#), as are the [Support Guide](#) and [Escalation Guide](#).

You can find documentation within the product or on [Monitor Documentation space](#) on [Worx](#).

For information about purchasing an upgrade or professional services, contact your account executive. If you do not know who your account executive is, or for other queries, contact us through our [website](#).

Changes in this release

For details, see the following topics:

- [New features and enhancements](#)
- [Fixed issues](#)

New features and enhancements

Here you can find the new features and enhancements in Aurea Monitor 2021 R2.1.

Table 1: New features and enhancements

Component	Issue ID	Description
	ACTA-61474	Improved Network Overview performance by 15.3x (with cash already loaded) and 24.0x (fresh installation)

Fixed issues

Here you can find the list of resolved issues specific to Aurea Monitor 2021 R2.1.

Table 2: Fixes in Aurea Monitor 2021 R3

Component	Issue ID	Description
Management Server	ACTA-56238	Upgrading database records from Standard to Enterprise returns <code>Invalid object name 'SYS.INDEXES'</code> error message
Intermediary	ACTA-56432	OAuth 2 access point protection: An appropriate HTML code with a clear error message should be returned on the client side if the <code>redirect_uri</code> parameter is not configured
Intermediary	ACTA-56441	OAuth 2 access point protection: A clear error message should be returned on the server and client sides if the scope parameter is not set
Intermediary	ACTA-56572	When configuring policies, the Custom Site Criteria: Type icons overlap the criteria text

Component	Issue ID	Description
Management Server	ACTA-56576	The active stabilizer's icon should not be red and flashing; its tooltip should not read 'alert' – as this is not an alert but a status icon
Management Server	ACTA-57484	When trying to filter Website static content, user is not able to select a site for the Specific Site option
Management Server	ACTA-57609	The equal sign = is missing before the values in Additional JVM arguments while creating custom Agent or Intermediary profiles
Management Server	ACTA-57622	The <code>destPrefix</code> and <code>jms.ext</code> related parameters are not inherited while creating custom Agent or Intermediary profiles
Intermediary	ACTA-57666	User is not able to access point contract if the Unique ID of an access point has the word 'api' included
Agent, Intermediary, Management Server	ACTA-57992	Passwords should be encrypted in Management Server, Intermediary, and Agent log files
Management Server	ACTA-57994	Derby database related information should not be logged if Monitor is configured with an external database
Management Server	ACTA-58101	Management server and application server should show trusted certificate expiration date in the same format, time zone included
Management Server	ACTA-58151	LDAP group attributes should be correctly saved when defined
Intermediary	ACTA-58257	On the Export Profile Wizard, the Name and Description fields should be wide enough to comfortably read the defined texts
Intermediary, Management Server	ACTA-58662	Users should be able to download anttask.zip without errors
Intermediary, Management Server	ACTA-58991	When user defines search criteria, a warning should be displayed if the specified end date is before the start date
Management Server	ACTA-59027	The New Stabilizer Switch Name field should not be shown as required while defining rules within a rule set

Component	Issue ID	Description
Intermediary	ACTA-59213	Memory leak on message field evaluation error
Management Server	ACTA-59415	The icon is missing for alarms and alerts generated by custom policies
Management Server	ACTA-59870	After renaming a custom added package in the file system, user is not able to delete the missing package or add a new one in Management Server
Management Server	ACTA-59876	The Clone button is missing on the profile list view
Intermediary	ACTA-60222	Export Profile upload should fail if the selected service group has no active revision
Management Server	ACTA-60365	Agents show 'Outdated' upon startup of additional Agent on another machine
Management Server	ACTA-60403	When using Active Directory, role-based using User-Attribute mapping does not work
Intermediary	ACTA-60581	When using the Throttling plugin, the 'Max Concurrent reached' counter in the events log is not updated on throttling
Intermediary	ACTA-61139	Intermediary not fully in line with RFC 7523 for JSON Web Token (JWT) authorization
Management Server	ACTA-61271	Clicking Show All Search Results when searching shows an empty dialog
Intermediary	ACTA-61288	ClientID should be displayed on UI during an OAuth2.0 client creation
Intermediary	ACTA-61290	User should be able to SET (creation) and CHANGE (modify) OAuth2 Client's client secret by using the UI
Management Server	ACTA-61292	Live traffic is not always showing if the 5 minutes time interval is selected
Agent, Intermediary	ACTA-61441	JSONPath plugin is returning alerts
Management Server	ACTA-61472	Statistics Details should not be fetched for hidden items
Management Server	ACTA-61566	Error is returned while running the maintenance script due to duplicate binding
Management Server	ACTA-61753	Internal server error occurs when trying to get the details of an audit log record

Component	Issue ID	Description
Intermediary, Management Server	ACTA-61946	Intermediary provisioning fails with null pointer exception
Intermediary, Management Server	ACTA-61948	User is not able to provision MultiValueCondition to Intermediary
Management Server	ACTA-61983	Support.zip contains errors due to LogDataSelect-Statement not being database type aware
Management Server	ACTA-62032	In the Statistic Details dialog box, the hovering hints for non-zero values should surround value indicators
Management Server	ACTA-62064	In the Website Static Content filter, the Node list should be sorted
Intermediary	ACTA-62228	Combo List items values are clipped at the end
Intermediary	ACTA-62312	SAML 2.0 assertion generation fails with exception <code>java.lang.NoClassDefFoundError: javax/res</code>
Management Server	ACTA-62326	The Statistic Details page intermittently becomes unresponsive while selecting the precision
Management Server	ACTA-62350	The expanded Statistics Details dialog is blocking the UI
Intermediary	ACTA-62416	Global call timeout should be exposed in the Advanced Tuning section of Agent and Intermediary launcher profile and the configured value should be provisioned with the AgentConfig
Intermediary	ACTA-62426	Policy for specific service group cannot be created
Management Server	ACTA-62460	In the Statistic Details dialog, X-Axis number changes unexpectedly after clicking on the Show Summary Section arrow
Intermediary	ACTA-62478	Global call timeout is not exposed on the Intermediary and Agent profile pages
Management Server	ACTA-62537	On the Timeline bar, when paused, the visual highlight of the selected time in terval should move to the left with time passing and the green vertical line should always point to the current time
Management Server	ACTA-57805	In Key Server Certificate , if the added certificate has a long serial number, the number may overflow its box and make other fields unreadable

Component	Issue ID	Description
Management Server	ACTA-59025	When defining a new reusable condition for a policy group, validation that mandatory fields are populated must be performed on every step of the wizard
Intermediary	ACTA-60220	If Active Object Editing is disabled in Configuration > Settings , users should not be able to delete active service groups
Management Server	ACTA-61267	On the tabs under Infrastructure , the Summary section overlaps the main section of the tab on narrow screens (or narrow browser window width)

About Aurea Monitor

Aurea Monitor provides operational and business visibility, root cause analysis, policy-based security and control of services in a heterogeneous environment. With it, you gain the quality, visibility, and control needed for business transaction assurance from development through application support. This is achieved with:

- Automatic end-to-end visibility to detect issues proactively and repair problems quickly and effectively.
- Business insight on executing transactions and tools to dynamically manage service behavior to optimize business outcomes.
- Flexible, standards-based support for authentication and authorization for web services unified under a single interface
- Centralized policy management and distributed policy enforcement providing consistent security and compliance
