Welcome to Insight 2021 R2.1

Aurea is happy to announce and provide release version 2021 R2.1 that fixes a few issues and provides additional improvements in Insight.

- **Release version:** 2021 R2.1

For details, see the following topics:

- [About Aurea Global Support](#)

About Aurea Global Support

You can find the setup files on the [Aurea Monitor Product Downloads](#) space on [Worx](#).

If you encounter a problem while using an Aurea product or require assistance with downloading the software or upgrading a product release, please, try to:

- Search the articles on the [Aurea Knowledge Base](#) for solutions to your issues.
- Search the product documentation and other product-related information that are also available on [Support Central](#).
- Ask your question on the [Aurea Integration Solutions Hub](#) on [Worx](#).

If you still cannot find a solution, open a ticket on [Aurea Support Central](#). Information about the support organization is available on [Support Central](#), as are the [Support Guide](#) and [Escalation Guide](#).

You can find documentation within the product or on [Monitor Documentation space](#) on [Worx](#).

For information about purchasing an upgrade or professional services, contact your account executive. If you do not know who your account executive is, or for other queries, contact us through our [website](#).

Changes in this release

For details, see the following topics:

- [New features and enhancements](#)
- [Fixed issues](#)

New features and enhancements

Here you can find the new features and enhancements in Aurea Monitor 2021 R2.1.

Table 1: New features and enhancements

Component	Issue ID	Description
	ACTA-61474	Improved Network Overview performance by 15.3x (with cash already loaded) and 24.0x (fresh installation)

Fixed issues

Here you can find the list of resolved issues specific to Aurea Monitor 2021 R2.1.

Table 2: Fixes in Aurea Monitor 2021 R3

Component	Issue ID	Description
Management Server	ACTA-56238	Upgrading database records from Standard to Enterprise returns <code>Invalid object name 'SYS.INDEXES'</code> error message
Management Server	ACTA-56576	The active stabilizer's icon should not be red and flashing; its tooltip should not read 'alert' – as this is not an alert but a status icon

Component	Issue ID	Description
Management Server	ACTA-57484	When trying to filter Website static content, user is not able to select a site for the Specific Site option
Management Server	ACTA-57609	The equal sign = is missing before the values in Additional JVM arguments while creating custom Agent profiles
Management Server	ACTA-57622	The <code>destPrefix</code> and <code>jms.ext</code> related parameters are not inherited while creating custom Agent profiles
Agent, Management Server	ACTA-57992	Passwords should be encrypted in Management Server and Agent log files
Management Server	ACTA-57994	Derby database related information should not be logged if Monitor is configured with an external database
Management Server	ACTA-58101	Management server and application server should show trusted certificate expiration date in the same format, time zone included
Management Server	ACTA-58151	LDAP group attributes should be correctly saved when defined
Management Server	ACTA-58662	Users should be able to download <code>anttask.zip</code> without errors
Management Server	ACTA-58991	When user defines search criteria, a warning should be displayed if the specified end date is before the start date
Management Server	ACTA-59027	The New Stabilizer Switch Name field should not be shown as required while defining rules within a rule set
Management Server	ACTA-59415	The icon is missing for alarms and alerts generated by custom policies
Management Server	ACTA-59870	After renaming a custom added package in the file system, user is not able to delete the missing package or add a new one in Management Server
Management Server	ACTA-59876	The Clone button is missing on the profile list view

Component	Issue ID	Description
Management Server	ACTA-60365	Agents show 'Outdated' upon startup of additional Agent on another machine
Management Server	ACTA-60403	When using Active Directory, role-based using User-Attribute mapping does not work
Management Server	ACTA-61271	Clicking Show All Search Results when searching shows an empty dialog
Management Server	ACTA-61292	Live traffic is not always showing if the 5 minutes time interval is selected
Agent	ACTA-61441	JSONPath plugin is returning alerts
Management Server	ACTA-61472	Statistics Details should not be fetched for hidden items
Management Server	ACTA-61566	Error is returned while running the maintenance script due to duplicate binding
Management Server	ACTA-61753	Internal server error occurs when trying to get the details of an audit log record
Management Server	ACTA-61983	Support.zip contains errors due to Log-DataSelectStatement not being database type aware
Management Server	ACTA-62032	In the Statistic Details dialog box, the hovering hints for non-zero values should surround value indicators
Management Server	ACTA-62064	In the Website Static Content filter, the Node list should be sorted
Management Server	ACTA-62326	The Statistic Details page intermittently becomes unresponsive while selecting the precision
Management Server	ACTA-62350	The expanded Statistics Details dialog is blocking the UI
Management Server	ACTA-62460	In the Statistic Details dialog, X-Axis number changes unexpectedly after clicking on the Show Summary Section arrow
Management Server	ACTA-62537	On the Timeline bar, when paused, the visual highlight of the selected time interval should move to the left with time passing and the green vertical line should always point to the current time

Component	Issue ID	Description
Management Server	ACTA-57805	In Key Server Certificate , if the added certificate has a long serial number, the number may overflow its box and make other fields unreadable
Management Server	ACTA-59025	When defining a new reusable condition for a policy group, validation that mandatory fields are populated must be performed on every step of the wizard
Management Server	ACTA-61267	On the tabs under Infrastructure , the Summary section overlaps the main section of the tab on narrow screens (or narrow browser window width)

About Insight

Insight provides operational and business visibility, root cause analysis, policy-based security and control of services in a heterogeneous environment. With it, you gain the quality, visibility, and control needed for business transaction assurance from development through application support. This is achieved with:

- Automatic end-to-end visibility to detect issues proactively and repair problems quickly and effectively.
- Business insight on executing transactions and tools to dynamically manage service behavior to optimize business outcomes.
